

Horizon S-Series

Translucent multiwall polycarbonate metal-framed skylight structures

Features:

- Glare free, diffused natural daylight for happier, healthier living and working environments
- Aesthetically pleasing narrow profiles with no exposed fasteners
- Reduces labor and material costs in new construction, retrofit, or renovation projects - fewer parts, faster on-site assembly
- Virtually unlimited design possibilities with a wide range of configurations
- High impact resistance
- Excellent UV protection
- Extensive glazing color and customized performance options

Design:

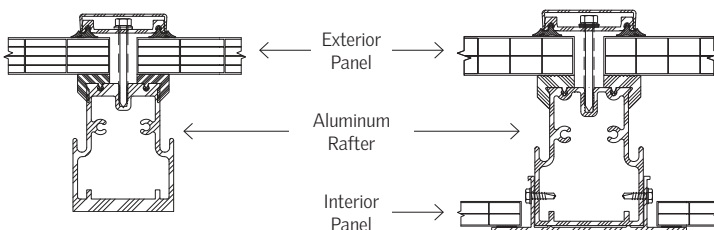

- Custom configured structural skylight system with standardized engineering, construction and installation
- Single or double multiwall polycarbonate panel systems
- Double glazed spans up to 30' wide, single glazed up to 40' wide*
- Fully customizable control over light transmission, solar heat gain, and R-value
- Lumira® aerogel filled panels are available for even greater thermal performance
- Available with a wide range of frame finish color options
- Smaller sizes can ship preassembled and glazed

Details:

Single Glazed System
 16mm or 25mm
 Polycarbonate Panels

Double Glazed System
 25mm over 16mm
 Polycarbonate Panels

No Exposed Fasteners
